

Suleiman Abdulkadir

Software Engineer

Kano, Nigeria | Open to Remote | suleiman.abdulkadir.dev@gmail.com | +234 816 071 4495 | [linkedin.com/in/suletete](https://www.linkedin.com/in/suletete) | github.com/suletetes | suleops.dev

PROFESSIONAL SUMMARY

Software Engineer with production experience building full-stack applications using React, Next.js, TypeScript, Node.js, and Python. Shipped a content authenticity platform with 4-layer cryptographic provenance, migrated a MERN app to AWS serverless handling 10,000+ requests/day at sub-200ms latency, and built an encrypted file vault across 15+ AWS services validated by 487 tests. I own features end to end from database schema to responsive UI to Terraform-managed infrastructure.

SKILLS

Languages & Frameworks	TypeScript, JavaScript, Python, React, Next.js, Node.js, Express, FastAPI, Django, Flask
Frontend	React, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion, Responsive Design
Backend & APIs	Node.js, Express, FastAPI, REST APIs, GraphQL, WebSockets
Cloud & Infrastructure	AWS (Lambda, API Gateway, S3, CloudFront, CDK, DynamoDB, RDS), Terraform, Docker
Databases	PostgreSQL, MongoDB, DynamoDB, Redis, DocumentDB, SQLite
Testing & Tools	Property-based testing (fast-check), Jest, CI/CD, Git, GitHub Actions

SELECTED PROJECTS

TrueFrame - Content Authenticity Gateway <i>Next.js, React, TypeScript, FastAPI, Python, Backblaze B2, C2PA, Cloudflare AI</i> · github.com/suletetes/trueframe - Architected a full-stack platform with Next.js and a FastAPI backend that stamps AI-generated media with 4-layer cryptographic provenance (SHA-256, LSB watermark, perceptual hash, C2PA signing) - Built a multi-provider AI generation pipeline (Cloudflare FLUX primary, Gemini fallback) with automatic failover and durable storage on Backblaze B2 - Engineered provenance layers that survive metadata stripping by social platforms, enabling public proof recovery through a Python verification API	2026
Taskly - MERN to AWS Serverless Migration <i>React, Node.js, AWS Lambda, DocumentDB, Terraform, CloudFront, API Gateway, WAF</i> · github.com/suletetes/taskly - Migrated a monolithic Express/MongoDB app to Lambda, API Gateway, and DocumentDB, now handling 10,000+ requests/day at sub-200ms latency - Cut infrastructure cost 95% by replacing always-on servers with event-driven Lambda, codified in 12 Terraform modules deployed via GitHub Actions OIDC - Implemented WAF rate limiting, canary deployments, and async processing with EventBridge and SES	2024
VaultStream - Encrypted File Platform <i>AWS, TypeScript, S3, DynamoDB, KMS, CloudFront, Lambda, Redis, Express, CDK</i> · github.com/suletetes/VaultStream - Built a file storage platform spanning 15+ AWS services with per-file KMS envelope encryption, defined entirely in CDK across 8 stacks - Optimized storage costs ~85% through S3 lifecycle tiering and delivered sub-100ms cached reads via ElastiCache Redis - Validated correctness with 487 tests including 19 property-based tests using fast-check	2025
TalentHive - Freelance Marketplace <i>React, Express, TypeScript, Stripe, Redis</i> · github.com/suletetes/talenthive Shipped a TypeScript-first freelance platform connecting 500+ professionals with Stripe payment workflows and real-time messaging	2024

- Automated invoice generation and dispute resolution through Stripe webhooks

EDUCATION

Bachelor of Science in Software Engineering - Bayero University Kano, Nigeria

Oct 2021 - Feb 2026
